Cancer and Metastasis Reviews 9: 393–396, 1990

CONTENTS VOL. 9, NO. 1, 1990

Announcement I

The significance of biological heterogeneity 1
H. Rubin

Cellular interactions in metastasis 21
F. R. Miller and G. H. Heppner

Chromosomal abnormalities in human breast cancer 35
W. M. Mars and G. F. Saunders

The invasive phenotypes 45
M. M. Mareel, F. M. Van Roy and P. De Baetselier

The current state of oncogenes and cancer: Experimental approaches for analyzing oncogenetic events in human cancer 63
P. J. Chiao, F. Z. Bischoff, L. C. Strong, and M. A. Tainsky

Tumor vaccines 81
J.-C. Bystryn

Transformation injury and the unicellular phenotype of malignant cells 93
P. Frost and Y. Chernajovsky

Instructions for authors 99

CONTENTS VOL. 9, NO. 2, 1990

Editors' farewell iii

Announcement iv

Human melanoma: Development and progression 101
M. Herlyn

Cell-matrix interactions during tumor invasion 113
J. R. Starkey

Spontaneous tumors in dogs and cats: Models for the study of cancer biology and treatment 125
E. G. MacEwen

Tumor progression: Potential role of unstable genomic changes 137
R. P. Hill

Orthotopic implantation is essential for the selection, growth and metastasis of human real cell cancer in nude mice 149
I. J. Fidler, S. Naito and S. Pathak

Instructions for authors 167

CONTENTS VOL. 9, NO. 3, 1990

A preface from the new editors 169

Introduction 171
J. Folkman

Organ-preference of metastasis. *The role of endothelial cell adhesion molecules* 175
B. U. Pauli, H. G. Augustin-Voss, M. E. El-Sabban, R. C. Johnson and D. A. Hammer

Autocrine regulation of cell growth and transformation by basic fibroblast growth factor 191
A. Yayon and M. Klagsbrun

Extracellular matrix-resident growth factors and enzymes: possible involvement in tumor metastasis and angiogenesis 203
I. Vlodavsky, G. Korner, R. Ishai-Michaeli, P. Bashkin, R. Bar-Shavit and Z. Fuks

Modes of FGF release in vivo and in vitro 227
P. A. D'Amore

Gangliosides, copper ions and angiogenic capacity of adult tissues 239
P. M. Gullino, M. Ziche and G. Alessandri

Vascular and interstitial barriers to delivery of therapeutic agents in tumors 253
R. K. Jain

Vascular attack as a therapeutic strategy for cancer 267
J. Denekamp

Instructions for authors 283

CONTENTS VOL. 9, NO. 4, 1990

THE ROLE OF CELLULAR PROTEASES AND THEIR INHIBITORS IN INVASION AND METASTASIS

Introductionary overview
Lance A. Liotta 285

Type IV collagenases in tumor invasion and metastasis
W.G. Stetler-Stevenson 289

Stromelysin in tumor progression and metastasis
S. McDonnell and L.M. Matrisian 305

Cathepsin D: A protease involved in breast cancer metastasis
H. Rochefort, F. Capony and M. Garcia 321

Cathepsin B and its endogenous inhibitors: the role in tumor malignancy
B.F. Sloane, K. Moin, E. Krepela and J. Rozhin 333

The role of urokinase-type plasminogen activator in aggressive tumor cell behavior
J.E. Testa and P. Quigley 353

Mechanisms of trophoblast invasiveness and their control: the role of proteases and protease inhibitors
P.K. Lala and C.H. Graham 369

Proteases in the schistosome life cycle: a paradigm for tumour metastasis
M.J. Doenhoff, R.H.C. Curtis, J. Ngaiza and J. Modha 381

Volume contents 393

Instructions to authors 397
